

Day 4: Tasks

1. **Connect a USB webcam to your computer, install any required drivers, and verify that the webcam works by opening the default camera app and capturing a photo.**

- Connected the USB webcam to the computer.
- Windows automatically detected and installed the required drivers.
- Opened the Camera application.
- Verified that the webcam video was displayed correctly.
- Captured a photo using the Camera app

2. **Set up a local printer (USB or network), install the correct driver, and print a test page to confirm successful installation.**

3. **Simulate a connectivity issue by unplugging the printer's USB cable, then use Windows Device Manager to identify and resolve the 'printer not detected' problem.**
Hint: Check for error icons and use the 'Scan for hardware changes' option after reconnecting.

Printer Not Detected Troubleshooting Using Device Manager

1. Disconnected the printer's USB cable to simulate a connectivity issue.
2. Opened Device Manager and checked for warning/error icons.
3. Reconnected the printer's USB cable.
4. In Device Manager, selected Scan for hardware changes.
5. Windows detected the printer and reinstalled the required driver.
6. Verified that the printer appeared correctly without any error icons.

Result: The printer detection issue was resolved successfully, and the printer was recognized by Windows.

4. **A user reports that their webcam video is not displaying in Zoom, but it works in the default camera app. Troubleshoot and resolve the issue so the webcam works in both applications.**
Hint: Check if another app is using the webcam or if Zoom permissions are enabled.

1. Opened the Camera app and confirmed that the webcam was working properly.
2. Closed the Camera app to ensure it was not using the webcam.
3. Opened Zoom and checked the Video settings.
4. Selected the correct webcam from the camera list in Zoom.
5. Verified that camera permissions were enabled for Zoom in Windows Privacy Settings.
6. Restarted Zoom and tested the webcam again.
7. Confirmed that the webcam video was displayed correctly in both the Camera app and Zoom.
